

# PEOPLEHR

# EXTENDED PROFILE

## OVERVIEW

PeopleHR is a cloud-based human resources platform designed for small and mid-sized businesses. It centralises core HR functions such as employee records, absence tracking, and document management in a single, user-friendly interface.

In early 2025, PeopleHR launched PeopleHR Evo, an AI-embedded experience powered by the Access Evo engine. Its first feature, Copilot, acts as an AI HR assistant that answers queries, automates repetitive tasks, and drafts HR content on demand.

## INTEGRATIONS AND EXTENSIONS

PeopleHR integrates with payroll solutions (including Sage and ADP), Slack, Google Drive, Zapier, and more via a public API.

## CORE FUNCTIONALITY

- **Employee records & self-service:** Maintain personal and contract details, certifications, and documents; employees access and update their own profiles via web or mobile apps.
- **Absence & time management:** Track holiday, sickness, and flexible-working requests; log and approve timesheets and expenses.
- **Recruitment & onboarding:** Applicant tracking system with CV parsing, interview scheduling and offer-letter templates; digital onboarding checklists.
- **Performance & learning:** Set goals, run appraisals and capture feedback; manage training courses and e-learning modules.
- **Reporting & dashboards:** Pre-built reports on headcount, turnover, absence, and engagement; exportable charts and data tables.

## AI & ANALYTICS (PEOPLEHR EVO)

- **Copilot AI assistant:** Responds instantly to HR questions (e.g., “How do I handle a grievance?”), summarises large documents, drafts policies, and to-do lists, and locates facts across your files.
- **Secure environment:** All prompts and responses remain confidential and are not used to train external models; role-based controls determine which documents Copilot can access.
